About Me

I'm a full-stack PHP developer passionate about building real-world web applications. I specialize in Laravel, TailwindCSS, and creating smooth user experiences with modern, scalable backends. Currently working on tools like XP Tracker and service management systems.

Skills

Languages:	PHP, JavaScript, HTML5, CSS3
Frameworks & Tools:	Laravel (Blade, Eloquent), TailwindCSS, Alpine.js
Databases:	MySQL
Other:	Docker basics, Electron, FFmpeg basics, API Development

Projects

XP Tracker — Gamified Progress Tracker

Built a Laravel application that tracks progress using an XP system, level-up logic, and customizable logs. Features include user authentication, dynamic Blade templates, and responsive design with TailwindCSS.

Service Request Management System — Internal Tool

Developed a Laravel-based request tracking tool with editable service requests, role-based permissions, and a messaging thread for direct responses on the platform. Includes profile pages and settings.

Portfolio Website (RadoMark.com)

Designed and deployed a personal portfolio using Laravel, Blade, and TailwindCSS. Showcases custom-built templates, responsive UI, and integration with reusable components.

Certification

Full-Stack Web Development Bootcamp (Ohio State University)
